

Improving Digital Resilience Through Foresight

Why Now?

- Today's risk landscape shifts constantly and rapidly as global instability, state-sponsored cyber activity, supply chain interdependence, and emerging technologies drive change.
- Cyber incidents now present enterprise-wide business risks creating operational, financial, legal, and reputational consequences.

Your Solution

- Next Peak can help your team build digital resilience to resist, withstand, adapt to, and recover from disruptions to your digital environment.
- We will equip you to effectively prepare and respond to high-risk digital events.

Four Steps to Strategic Foresight

1

INSIGHT

Understand your risk drivers

2

PREPARATION

Scenario planning for digital storms

3

EXECUTION

Apply your plans to weather the storm

4

EVOLUTION

Debrief and turn lessons into future readiness

Our Approach

Our services leverage the Next Peak framework in Understanding Digital Resilience.

DIGITAL RESILIENCE WORKSHOP

Identify key risk drivers & plausible digital resiliency scenarios to guide your planning

GEO CYBER RISK INDEX (GCRI)

Country-specific cyber risk analysis that takes into account prioritized risk drivers for your organization

SCENARIO PLANNING & EXERCISES

Expert-led events to test your processes against severe but plausible scenarios

DIGITAL RESILIENCY ASSESMENT & ROADMAP

Implement tailored mitigation strategies and controls built on a digital resiliency assessment

STRATEGIC NAVIGATION ADVISORY

Expert advisors who help your team own strategic foresight and mitigate risks from polycrises
